

JEAN-LUC TWITE ILUNGA

Pretoria, Gauteng, South Africa | Mobile: +27 699271584 | Email: jeanluctwite21@gmail.com

PROFESSIONAL SUMMARY

I am Motivated and skilled **Full Stack Software, Data, and DevOps Engineer** with hands-on experience in building scalable applications, managing data pipelines, and automating deployments. Proficient in **Python, Java, MySQL, Spark, Hadoop, Django, React, and AWS**, with strong expertise in **CI/CD, Docker, Terraform, and Jenkins**. Adept at developing end-to-end software solutions, optimizing data workflows, and ensuring reliable, secure infrastructure through DevOps best practices.

CORE COMPETENCIES

Data Engineering

Full-Stack Software engineering

DevOps & CI/CD Engineering

EDUCATION

Diploma in Computer Science

Tshwane University of Technology, Graduated: 2024

National Senior Certificate

Maadini Institute, Graduated: 2018

TECHNICAL SKILLS

Programming: Java, Python, React, HTML, CSS, Angular Node Js, Spring boot, Java EE ,
python flask, Bootstrap, RestAPI's

Data Engineering: Apache Spark, Hadoop, Apache Kafka, power BI, Denodo, DBT (data build tool),
airbyte, airflow, MySQL, Postgres, Hadoop, aws s3, MongoDB

Cloud platform: AWS, AZURE

Version control: GitHub, Gitlab

PROFESSIONAL EXPERIENCE

- Designed and implemented ETL pipelines for transforming and integrating large datasets from diverse sources.
- Optimized SQL Server queries and database schemas to enhance data processing performance.
- Developed scalable data ingestion workflows using Apache Spark and Azure Data Factory.
- Collaborated with cross-functional teams to identify data requirements and deliver business insights.
- Automated data quality checks and validation processes to maintain data integrity.
- Designed and implemented the **Entity Relationship Diagram (ERD)** and created normalized relational tables in **MySQL**.
- Created a **Denodo derived view** to aggregate and prepare data for reporting purposes.
- Successfully integrated data into **Excel** for end-user access via Denodo's data virtualization platform.
- Responsible Data management, Data Quality, Data Validation, Data Governance, Data analytics and administrative
- Developed and deployed APIs to facilitate seamless data integration with cloud-hosted services.
- Developed a full-stack carwash booking platform using Java EE, MySQL, and responsive web technologies for end-to-end appointment and customer management.
- Built an interactive game discovery platform using Angular, delivering an immersive user experience with seamless navigation and community-driven engagement
- Built and maintained CI/CD pipelines for automated the set up of cloud infrastructure ,deployments, data workflows, network security.
- building an AI-based emotion recognition system to analyse and classify user emotional states from input data
- Implemented data preprocessing, model training, and integration into internal systems.
- Analysed system requirements, developed technical specifications, and designed scalable architectures.
- Developed front-end solutions using React, enhancing user interfaces for web applications.

- Designed and developed a healthcare Android app using Java and SQLite to enable appointment scheduling, symptom tracking, and medication reminders for improved user health management.
- Developed a responsive cross-platform fitness website using React Native and React.js, enabling users to access workout plans, track progress, and interact with wellness content.
- Developed a responsive cross-platform cars rentals website using React.js for frontend and node.js for backend enabling users to book cars online.

SOFT SKILLS

- **Solid Interpersonal Skills**

Able to build strong relationships with team members, stakeholders, and clients, fostering effective collaboration and trust.

- **Self-Starter**

Takes initiative and works independently without needing constant supervision, always seeking ways to improve processes and outcomes.

- **Problem Solving**

Skilled at analysing complex challenges, identifying root causes, and implementing effective, data-driven solutions.

- **Adaptability**

Thrives in fast-paced and changing environments, quickly adjusting to new tools, tasks, or priorities.

- **Time Management**

Efficient at prioritizing tasks and managing workloads to meet deadlines without compromising quality.

- **Deadline Driven**

Maintains focus and delivers results under pressure, consistently meeting project and task deadlines.

- **Creativity**

Brings fresh ideas and innovative thinking to problem-solving, UI/UX design, and project execution.

- **Strong Written and Verbal Communication Skills**

Clearly conveys complex ideas and technical concepts in both written reports and verbal discussions, tailored to diverse audiences.

- **Self-Confidence**

Approaches tasks and decisions with assurance, motivating others and handling feedback constructively.

- **Leadership Experience**

Demonstrated ability to guide teams, make informed decisions, and take ownership of projects from conception to completion.

- **Great Team Player**

Collaborates effectively with diverse teams, values feedback, and contributes positively to team dynamics and shared goals.

CERTIFICATIONS

Azure Certified Developer, Cisco Certified Network Associate (CCNA), Data Engineering Certification – Coursera, AWS practitioner and developer certified

LANGUAGES

- English: Fluent
- French: Native
- Swahili: Native

Volunteering

- Worked as a Gardner in an orphan house
- Worked as project manager at Congolese student organisation
